Print or Save Options and Alternate Pages

The student manual directs students to printing maps in Lessons 4, 5, 6, 7, 8, 9, and 10. The maps created in GEODESY are large digital files and can require large amounts of printer ink. It is possible that these maps can be saved as Windows bitmap images for instructor viewing at a later date.

Alternate student manual pages giving directions for saving the maps as Windows bitmap images follow. If you desire students to save maps to the computer instead of printing, you should substitute these pages in the student manual.
